## Session Description

### Maternity Session

Best if completed between the 27<sup>th</sup> and 35<sup>th</sup> week of pregnancy.

### Newborn Session

This session is completed within the first 3 weeks after the baby arrives. The Newborn Session is a "Low key" session (black background) with both mom and dad wearing black tops. Baby can be in a solid color sleep & play (blue for boys, pink for girls) in just a diaper only or in his or her birthday suit. This is a head to chest session for parents with the baby as the focal point

### Stage 2 Session

This session, completed between 4 & 5 months when the baby is able to hold his or her head up while lying on his or her belly, is a "High Key" session (White background) White or off-white tops for mom and dad if they choose to participate.

### Stage 3 Session

It is suggested that the baby is able to sit for several moments unassisted for this session. Plan which props you would like for this session.

### First Birthday Session

This session is completed between 11 and 13 months of age. In addition to the regular portrait session you will be invited to have a baby cake series of photos taken at this time.

In the baby cake series, your baby is in a diaper, or white t-shirt, seated on a white paper backdrop with a small birthday cake. The baby is then allowed to have his or her own personal cake feast. Photos are taken during the cake experience to create a birthday collage.

Newborn Fingers & Toes Collage Sample
