Pin Ups

Plan a wine & cheese photo shoot with your friends, or have a solo session, and come away with some amazing photo images when you're through.

These sessions involve tastefully created, fun and sexy glamour and pin up images.

Before your session, you will be provided with some sample pin up poses to choose from. A clothing hair and makeup consult prior to your session is also encouraged so that you will be in sync with the style of these photos. The session is done using a white background. In some cases substitute background will be dropped in during the enhancement portion of your final image. Full length (pin up style) photos are taken as well as head & shoulder shots.

Once the session is complete you will be sent a link to a gallery of your images, where you will select the images that you want to have printed. These images are touched up as needed to remove any blemishes, stretch marks, etc... Slimming techniques used upon request. You can choose to have your Pin Up images look animated or true to life with an all white or colored or cartoon style backdrop.

What to wear?

Clothing can be as revealing as you want. You can be completely dressed or in a bikini. You are in total control of your choice of attire for your session
